Hi Jayne,

It was nice catching up with you and Ge yesterday. I wanted to take a moment and compliment Ge for the outstanding job he's done in maintaining the pool for Evolutions Fitness. The clarity of the pool water under his supervision has been truly remarkable. It's evident that his attention to detail and dedication to ensuring health department standard of water quality has not gone unnoticed. The recent upgrades to the system, Chemical controller and Uv system read and monitor the cleanliness and health of the water, and it's been transparent and a testament to the level of commitment and diligence of Ge's oversight. I and our technicians have observed the pool operations and have noticed Ge's proactive approach to maintenance, his professionalism has not only reinforced the quality of the pool water but also enhanced the safety as well.

Best,

Carlton Russell
